LinkedIn: [linkedin.com/in/céin-o-rourke-ba574910a/](https://www.linkedin.com/in/céin-o-rourke-ba574910a/)

Nationality: Irish | Date of birth:

08.07.1995 | Driving licence: B

PROFILE

Software Developer with experience in automotive software, API/E2E testing, ECU communication, Linux-based test infrastructure, databases, Web-GUI development, automation scripting, and monitoring. Practical background in requirements management, automated testing, simulation tooling, and maintaining reliable 24/7 test-result systems.

WORK EXPERIENCE

01/2025 - Present

Software Developer - IBM Maximo Project

Volkswagen Group Digital Solutions | Automotive / Enterprise Asset Management

- Develop and maintain automation scripts for testing, validation, and project support workflows.
- Perform functional and technical testing for IBM Maximo-related processes in a Volkswagen project environment.
- Support the build-out of a monitoring system integrated with OpenShift.
- Help integrate Grafana, Prometheus, and Loki for metrics, logs, dashboards, and operational visibility.
- Analyse defects, improve test coverage, and support reliable software delivery.

Technologies: IBM Maximo, Python, Bash, OpenShift, Grafana, Prometheus, Loki, GitLab, Linux

01/2024 - 12/2024

Software Developer - Virtual VIN Ordering Project

Volkswagen Group IT Solutions | Automotive

- Developed software for ordering virtual VINs used in automotive testing workflows.
- Worked on a TypeScript frontend and Java backend to support test-data ordering and processing.
- Implemented and tested application logic, API interactions, and user-facing functions.
- Collaborated with project stakeholders to refine requirements and validate delivered functionality.
- Supported debugging, issue analysis, and maintenance of the test-support application.

Technologies: TypeScript, Java, REST APIs, GitLab, Linux, Automotive Testing

08/2021 - 12/2023

Software Developer / Engineer / Test Automation

Volkswagen Group IT Solutions | Automotive

- Designed and implemented automated scripts for E2E, API, frontend and mobile app testing.
- Developed simulations for vehicle systems and manipulated signal

communication with ECUs.

- Designed and created Web-GUI tooling to control ECU signal manipulation and simulate realistic in-car scenarios.
- Built and maintained Linux-based server and virtualisation environments for communication with ECUs and relevant backends.
- Created and maintained databases and integrations for automated testing tools to capture, store, and retrieve test results 24/7.
- Analysed errors and optimised test processes to reproduce real-world driving conditions.

Technologies: PHP, SQL, MariaDB, Python, Bash, Apache, Selenium, Appium, GitLab, Linux, ODIS, Cptool

Technology Consultant

AKKA DNO GmbH | Consulting

- Requirements management for a Swagger API.
- Wrote JSON scripts to interact with API endpoints and support testing workflows.
- Presented findings and technical results to clients.
- Performed automated testing for mobile online services.
- Created and maintained databases.
- Configured ECU diagnostics and supported automotive testing topics.

Graduate Engineer

AKKAdemy Switzerland | Consulting

- Presented new ideas to clients in an innovative manner.
- Worked with different clients and adapted to varied project situations.
- Collaborated within a team of consultants.

10/2018 – 07/2021

09/2018 – 10/2018

EDUCATION AND TRAINING

2018 - 2019

Graduate Engineer Program

AKKAdemy Switzerland

- Presentation skills, communication skills, teamwork, and interpersonal skills.

2014 - 2018

Computer Science International

Dublin Institute of Technology / Hochschule Darmstadt

- Object-oriented programming and software development foundations.
- Coursework and practical skills in PHP, C, C#, C++, Python, SQL, Java, Linux, Bash, and GitHub.

2008 - 2014

Leaving Certificate (Abitur)

De La Salle College Churchtown, Ireland

TECHNICAL SKILLS

Programming / scripting

Python, Bash, TypeScript, Java, PHP, C, C#, C++, SQL, JSON

Testing / automation

E2E testing, API testing, frontend and app testing, automation scripting, Selenium, Appium

Automotive / ECU

ECU diagnostics, signal simulation, ODIS, CPtool, automotive test environments

Infrastructure / monitoring

Linux, Apache, server hardware, virtualisation, GitLab, OpenShift, Grafana, Prometheus, Loki

Databases

MariaDB, SQL, database creation, maintenance, and test-result storage

LANGUAGES

Language	Level	Notes
English	Mother tongue	
German	B1	Understanding, speaking and writing

ADDITIONAL STRENGTHS

- Clear communication with clients and development teams.
- Code quality control through reviews, documentation, and maintainable scripts.
- Organisation and self-management from hardware ordering, code maintenance, and onboarding new team members.
- Strong practical command of Linux systems and Microsoft Office tools.
